Re: Fuel Management on IR3

Dear Neskonlith Community,

Sk'atsin Silvatech Ventures LLP (SSV), through Neskonlith, has applied for funding to complete on-reserve fuel management activities. The work will include pruning, thinning, piling and chipping of ladder fuels and forest debris to reduce the risk of catastrophic wildfires within the community. We will also be chipping the debris and shipping the chips to a local buyer to be used as hog fuel. This helps to offset project costs but more importantly, fully utilizes the forest resource and provides an alternative to open burning.

Fuel management work was originally scheduled to commence on IR3 as of Wednesday, August 26th but was delayed. **Fuel management work will now commence as early as Thursday, October 29th and will take approximately five weeks.**

The area to be treated is identified as IR3-1 on the attached map.

Please be cautious around our SSV crew as we conduct fuel management activities. The crew will be actively falling trees and chipping debris. Watch for signage around our work areas and please give our crew space to do their work safely.

Please contact me if you have any questions,

Thank you,

Shane Vincenzi, Manager,

Sk'atsin Resources LLP.
