

# SMALL ENGINE REPAIR

7 Week Program

- Limited Seating: Men & Women to Apply -

Does starting your lawnmower every spring cause endless frustration? Then sign up for our small engine repair class and learn about ignition, compression, starting systems, valves, timing, and governors. This theory and practical class will provide participants the opportunity to work on their own lawnmowers, generators and weed eaters — practically any two and four stroke engines.

Participants will receive the following safety tickets:

- » Orientation
- » WHMIS
- » OFA I
- » Goal Setting
- » Money Smarts
- » Budgeting
- » Critical Thinking

General Requirements:

- » Aboriginal Decent or Self-Identifying
- » Good Health
- » Financial supports are available to students, including a living allowance.

Note: Incomplete registration forms will not be accepted. If you need assistance in completeing your registration form, please contact **Charissa Buffalo, Program Assistant** to book an appointment.
